## Prairie Plant Underground Concrete Pour-2001

*Successful project utilizing  
Pre-mixed Dry Concrete Material to construct Floor*

### Prairie Plant Grow Operation-2001

# HUDBAY MINERALS

**CUSTOMER:**

Prairie Plant-Medicinal Marijuana Grow Operation

**LOCATION:**

Hudson Bay Mining & Smelting, Flin Flon, MB

**PROJECT:**

Pour a section of concrete flooring 180 feet underground in a section of a Mine for use by the Grow Operation

**CHALLENGES:**

- Underground operation, all equipment, materials had to be move underground within a Mining Company area of leased space.
- Intricate pluming, electrical systems for lighting and hydroponics of the grow operations requirements.

**PROJECT PLAN:**

•The client needed a secure facility to produce legalized Marijuana for medicinal purposes. The facility needed concrete flooring and infrastructure to support the growing facilities. The leased space was underground in an existing mine. Bags of pre-mixed Betty Crocker material and equipment to mix, place and finish the concrete was sent underground.
