

DESCRIPTION

Multicrete™ specializes in the designing and manufacturing of Underground Hybrid-Wet™ Bulk Shotcrete Storage, Loading and Mix-plant solutions tailored to compliment your existing mine infrastructure. We also offer a wide range of Support Equipment such as Multicrete's Portable Accelerator Dosing Unit which is a simple way to supply and distribute concise amounts of liquid accelerator to your shotcrete application . It's simplistic yet portable design makes it a great user-friendly design.

PURPOSE

When the need for liquid shotcrete accelerator for your shotcrete program is high but the circumstances dictate that extreme portability is essential with your application this is the best unit to rely on. Self-contained or truck mounted systems are available.
